EDUCATION

Bachelor of Technology

Technocrats Institute of Technology, Bhopal (M.P.)

2022 - 2026

Courses
- Computer Science with Artificial Intelligence & Machine Learning

High School

De Paul School, Satna (M.P.)

2021 - 2022,

Courses
- Mathematics & Physical Education

PROJECT

Employee Management System

Developed a full-stack Employee Management System to perform CRUD operations for employee records. The application allows administrators to add, update, view, and delete employee details. Integrated a responsive UI built with Angular and connected it to a Spring Boot backend with RESTful APIs. MySQL was used for persistent data storage, and the project followed MVC architecture to ensure clean separation of concerns.

Portfolio Website

Designed and developed a personal portfolio website to showcase projects, skills, and achievements as a Java developer. The site features smooth navigation, responsive design, and interactive elements built using JavaScript. It reflects a clean UI/UX and follows modern web development practices, making it accessible across different screen sizes and devices.

TECHNICAL SKILLS

Java-Programming

Hibernate, Servlets

Docker

GCP (Beginner)

Type Script

JS, J-Query

Git, GitHub

API Gateway

Web Services, API

Python-Programming

My SQL, NoSQL

Angular Framework

Spring, Spring Boot

HTML, CSS

Maven

Tomcat

Functional Programming

Web Application Frameworks.

- Soft Skills: English(Fluent)
 - Hindi(Native)
 - French(Learning-Beginner Level)
